FOR OPTIMUM  
PRODUCTIVITY**

**VETS**

**ANABOOST**

**Multi Gluconeogenic High Energy Feed Supplement  
Fortified with Vitamin B Complex and Minerals**

# ANABOOST

Multi Gluconeogenic High Energy Feed Supplement  
Fortified with Vitamin B Complex and Minerals

## Nutrients Available:

- ▶ **Gluconeogenic (GNG) Precursors** helps to avoid feed intake depression while increasing blood glucose and boosting milk production to its optimum. Anaboost is inbuilt with four GNG factors (I to IV) to make it more efficient for ruminants.
- ▶ **Vitamin B<sub>12</sub>** acts as a coenzyme for various metabolic functions including fat and carbohydrate metabolism and protein synthesis. Vitamin B<sub>12</sub> is vital for glucose production in ruminants, which is essential to meet high energy demands of lactation and growth.
- ▶ **Nicotinamide** is most effective on the regulation of glucose metabolism and Nicotinamide Adenosine Dinucleotide (NAD)-sirutin pathway, related to mitochondrial biogenesis. Supplementation with Nicotinamide in early lactation reduce rate of fat mobilization, decrease concentration of ketones in blood and increase blood glucose level.
- ▶ **Cobalt** supplementation together with GNG Precursors helps to prevent ketosis accentuated due to cobalt deficiency. Cobalt also ensures Vitamin B<sub>12</sub> production to maintain carbohydrate, fat and protein metabolism and appetite.
- ▶ **Chromium** potentiates the action of insulin and is also known as part of glucose tolerance factors. It assists dairy animals in efficiently partitioning glucose. Without chromium, large amounts of available glucose would otherwise be supplied to the growing foetus and to the milk component lactose, there by reducing the dietary glucose available for normal maintenance.

## Salient Features:

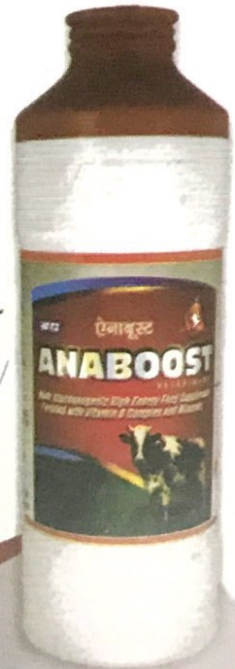

- ▶ Helps to bring back animal to feed & optimum milk production
- ▶ Multi Gluconeogenic precursors provide high energy
- ▶ Significantly decrease chances of negative energy balance by providing instant energy
- ▶ Improves milk production and helps to prevent ketosis
- ▶ Ideal feed supplement for pre and post calving periods to boost up energy

## Recommended administration:

**Cattle & Buffalo :**

100 mL to 200 mL orally once daily

**Presentation:**  
1 L pack with  
measurable container  
made from food  
grade material

Sole Distributor in Bangladesh.
